STONY PLAIN SUN.

VOLUME ELEVEN.

STONY PLAIN. ALBERTA. THURSDAY. SEPT. 18. 1930

Whole Number 528

Edmonton Beach.

Miss Rachel Robertson, the teacher at Cottage lake school who won the Teachers' Special prize of \$5 offered by Mr Barrie at July 1st sports, has given this with the \$1.50 the school won, and has purchased 1 flag, 1 Giant dencil sharpener, 2 baseball bats.

The Plaza Tea Room girls are arranging to secure the Tea room concession for next year, and are leaving shortly for Nova Scotia, where they will spend the winter.

Mr L. Wight was out from the City, and closed his cottage for the season.

Mr and Mrs Geo Powell paid the Beach a visit, and have closed their cottage until the spring.

Mr Scott's store, on South side was burnt to the ground Tues. evg. while he was playing cards at a friend's next door. Nothing saved from the stock. Some insurance was carried.

Mr Barrie intends keeping the store open until freeze up. He will then move to Edmonton.

For Sale—Dry Wood, in pole lengths in piles at Edmonton Beach farm: also 2 sheep & lamb. J A Barrie. 28

Stony Plain and District.

Mr and Mrs Paul Werner are leaving on Sat. Sept. 27, for a visit with friends at the Coast cities. The trip is being made thru the courtesy of the C.N. Ry., for which Mr Werner is an agent in the Immigration Dept.

Week-end visitors in Stony included Val Mohr, Mundare; Richard Rothe, Edmonton; and Bill Stafford, Edmonton.

John Reiser has rented the house on the Hill recently vacated by the A.P. Police. The Reiser house on 3d St. has been taken by Mr Baron.

A silver tea and sale of cookery will be held Saturday afternoon in United Church building.

There has developed, locally, a scarcity of men for harvest, add wages have, now gone up to \$2 a day.

The local Glee Club's effort in giving a dance met with quite a success on Friday evening last. The Moose Hall floor was crowded when the orchestra struck up.

Stony's ball tossers had an invitation to go to Villeneuve on Sunday, to meet their old opponents from Riviere Que Barre, but owing to the rainy weather the trip was not made.

The Cash Store will be closed on Tuesday and Wednesday, Sept. 23d and 24th.

IMPERIAL TEA

'Fresh from the gardens'

Economic Unity Of The Empire

Within a few days the Imperial Economic Conference will be convened in London, England, and representatives of the British Government will sit down at the conference table with representatives of the self-governing Dominions and discuss matters of mutual concern to all members of the British Commonwealth of Nations.

It will be a momentous, an epoch-marking event in the history of the Empire. There have been Imperial Conferences in the past, but they have had to do with constitutional and political aspects of our Empire relations. For the first time serious consideration is to be given to the economics, the trade and commerce of the Empire as a unit, and to the future lines of policy to be followed by each British nation in its trade relations with the Motherland and the other Dominions on the one hand, and with the rest of the world on the other hand.

The conference, therefore, will make history, and exert a profound influence on the future of the self-governing Dominions, the British Isles, the widely-scattered British colonies, in a word, the whole Empire, while at the same time its decisions will inevitably create a reaction in, and affect the policies of all other nations. A nation can no longer live unto itself alone. The adoption of any given policy by one of the major nations of the world in the present advanced state of our world civilization affects all other nations. They must take cognizance of it and govern themselves accordingly. And if this is true of the action of any one nation, it is immeasurably more true of a great union of nations comprising one-quarter of the earth's surface and more than one-quarter of the world's population.

The forthcoming Imperial Economic Conference is fraught, therefore, with great good. Today, politically and sentimentally, one is divided. It is divided economically, each individual self-governing unit treating each other in matters of trade much the same as they do foreign countries, and each coping singly with great economic problems which through joint action they might be able to solve.

The first question for the approaching Conference to consider and decide is: Shall this condition continue? Can it continue with safety to the future of the Empire? The Empire was created by conquest and built up by trade. The day has passed when Great Britain can dominate the trade of the world. Entirely new world conditions have developed, particularly during and since the Great War. As a result Britain has lost much of her world trade and economic and financial predominance. The whole world has become industrialized. Single handed Britain cannot hope to regain her leadership in trade and commerce, but cannot she do so in co-operation with the Dominions? Will political and sentimental ties hold the Empire together if its component parts are bitter rivals in trade, giving advantages to foreign countries, regardless of the welfare of sister British nations, solely because it seems essential to the individual unit to do so?

These are matters for the consideration not only of Britain but for all of the Dominions as well. They transcend party politics everywhere. It is the future of the Empire that is at stake.

Assuming the decision of the Imperial Economic Conference to be that such a condition cannot continue, that they must unite upon economic lines as well as upon political lines, the next step is to find common ground of action. Admittedly it is in connection with the working out of details of policy that definite, concrete problems of opposing and conflicting interests will arise. They cannot all be solved at once, but a very real start can be made along lines of least resistance, leaving the future, in the light of actual experience, to further extend and develop the agreed upon policy as circumstances may dictate to be of mutual advantage.

A recent newspaper despatch from Ottawa intimated that the West was not greatly interested in the outcome of the Imperial Economic Conference. No greater misconception could possibly exist. The West is vitally interested. To a greater extent, perhaps, than any other part of Canada, its future is wrapped up in a successful outcome to the approaching deliberations in London. In no part of the Empire will the people evince a greater interest, possibly even anxiety, than on the prairies of this Dominion.

Making Sure Of Good Seed

The Ontario Department of Agriculture is taking time by the forelock in so far as making preparation for the World's Grain Exhibition and Conference, at Regina, in 1932, is concerned. Farmers are being urged by the department to keep this year's seed in the event of the crop of next year not being up to the high standard of former years.

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise. The best help is Phillips' Milk of Magnesia. For years its invention has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

What's In A Name

Wimble Chicken and Bert Bird, of London, England, have announced their engagement, which brings back memories of another London affair, a little while ago when Archie Rook was married to Carrie Swan, with Rev. James Crowe officiating as clergyman. The couple were driven to their home, which they called "The Nest," by Robert Starling.

Indigestion

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude way. Go learn—now—why this method is superior.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 60 years in correcting excess acids. Each bottle contains full directions—any druggist.

Honeymooners Take To Air

Journey By Train Or Ship Is Considered Old-Fashioned

Honeymooners by anything so common-place as a train or ship are now "frantically old-fashioned," says the London Daily Mail. A journey to Paris by air is the only fitting beginning of a modern wedding tour. A Croquet official says that honeymoon couples are departing and arriving almost daily. Brides are arriving from church still in their wedding gowns and veils, blushing as they are pelted with confetti while boarding a plane, which is usually decorated with flowers, but nobody has yet attempted to tie a lucky shoe to the tailskid.

Do You Value Your Health?

If your health is poor; if you are pale, nervous and easily tired; if you suffer from headaches and backaches; if your digestion is bad you may depend upon it that these symptoms come from an impoverished state of the blood. That unless this condition is remedied a complete breakdown may follow. Dr. Williams' Pink Pills are perfect medicine for any one in this condition. They enrich and purify the blood and thus promote health and strength.

Mrs. G. M. Andrews, Halifax, N.S., writes: "My husband, Mr. J. H. Andrews, has 'Pink Pills' in the house. When I was a young, anemic girl they completely restored my health. After marriage my health broke down and once more these pills brought me back to health. My little girl told me how well I look and for this Dr. Williams' 'Pink Pills' deserve all credit. You can get these pills at all medicine dealers or by mail at 50 cents a box from Dr. Williams' Medicine Co., Brockville, Ont."

Useful To Motorist

Recent Invention Shows Driver When Headlights Are Not Burning

It is often difficult to get sometimes impossible to tell from the driver's seat whether both headlights are lighted. Dr. W. Kennedy Fenton, Toronto, has invented a simple, yet effective way to tell. A little gadget that is readily attachable to headlights and constantly reveals to the driver whether the lamps are lit or not. They are small reflectors in various designs which fasten to the headlight rims, they are luminous at night and visible from the driver's seat.

Asthma Is Torture. No one who hasn't gasped for breath in the power of asthma knows what such suffering is. Thousands do know, however, from experience how immeasurable is the relief provided by that marvelous preparation, Dr. J. D. Kellogg's Asthma Remedy. For years it has been relieving the most severe cases. If you are a sufferer do not delay a day in securing this remedy from your druggist.

Predicts Speedy "Flying Subs"

Will Cruise Eight Miles Above Earth Says Edward Warner

"Flying submarines" to cruise at 250 miles an hour eight miles above the earth, were predicted by Edward B. Warner, president of the Society of Automotive Engineers.

Cruising speeds of 100 to 250 miles an hour were sufficient for present needs, he declared, except in certain parts of the west and north, where travellers wish to fly 1,500 miles between dawn and dusk. When more speed is demanded the "submarine" and the "rocket plane," long a dream of Glen Curtiss, would be developed, Warner said.

Africa Interested In Grain Show Evidence that competitive exhibits from far off Transvaal, South Africa, will be received for entry in the World's Grain Exhibition and Conference at Regina, 1932, is found in a request to the office of the exhibition for a number of tags for attaching to exhibits. The Harthebeespoort Experiment Station at Brita, Transvaal, is also anxious to receive special information regarding the exhibition of corn.

The greatest mistake we can make in life, is continually to be fearing that we shall make one. Never explain our friends do not seem to like and your enemies will not believe you.

Use Minard's Liniment For Foot Ailments.

W. N. U. 1855

Her Three Children Troubled With Diarrhoea

Mrs. Leo Lapointe, Laurier, Man., writes:—"My three youngest children were very bad with diarrhoea. I tried all kinds of remedies, until a kind old lady told me to try Dr. Fowler's Extract of Wild Strawberry. I got a bottle right away and started giving it to them, and the next day the diarrhoea had stopped altogether. Now I will know what to do when any of my children are troubled that way again."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Rural School Supervision

New Plan Of Rural School Improvement Insanitated In Saskatchewan

Announcement was made recently by Premier J. T. M. Anderson, Minister of Education, of the appointment of the first rural school supervisor for Saskatchewan, under the new plan of rural school improvement being put into effect by the Department of Education.

Miss Mary Isabella Grant, of Cabri, Sask., is the first supervisor to be appointed by the "Public Service Commission and will assume her duties immediately in the new experimental supervisory school area in the neighborhood of Kindersley and Glidden, Sask.

The appointment of rural supervisors, according to the premier, is being made in accordance with numerous requests from school trustees and ratepayers throughout the province who wish to co-operate with the Department of Education in a plan to provide closer supervision of rural school education.

The Minister of Education believes that the experiment will do much towards solving the many problems of Saskatchewan's rural school education.

Is it usually safe to say that when a child is pale, sickly, peevish and restless, the cause is worms. These parasites range the stomach and intestines, causing serious disorders of the digestion and preventing the infant from deriving sustenance from food. Miller's Worm Powders, by destroying the worms, correct these faults of the digestion and serve to restore the organs to healthy action.

Despite the cold and long sunless periods in the Arctic zone, about 2,000 specimens of plant life have been discovered there, among them willows, junipers, ferns, mosses and numerous flowering plants.

Inhalo Minard's Liniment for Asthma.

Commercial fruit production last year in Canada had a value of \$49,591,240, of which Ontario accounted for \$8,656,097; British Columbia, \$6,766,650; Nova Scotia, \$2,800,089; Quebec, \$1,135,846, and New Brunswick, \$192,659.

Detect Sounds In Water

Ultra-Sonic Beams Permit Secret Communication Between Ships

Secret communication between ships by means of ultra-sonic beams projected through water was suggested as a future development of radiation by Dr. R. W. Boyle, of the national research laboratory at Ottawa, who addressed the fifth annual convention of the Institute of Radio Engineers in the physics building of the University of Toronto.

Ultra-sonics, or sounds that have too short a wave-length to reach the human ear, have been used with success in the detection of submerged objects. Dr. Boyle explained, and he believed that future development of their use would open up a new means of communication.

Showing sketches of ships provided with projectors of these beams, fixed to their hulls below the water line, he suggested that beams might be interchanged between ships and their radiations utilized by means of code to send and receive messages.

Icebergs may be detected in deep water more successfully by these beams than is usually recognized, he said.

Steel hulls, or submarines could be detected with accuracy when at a distance of four miles, he said, and land could be detected when six miles away.

Perfect dyeing so easily done!

DIAMOND DYES contain the highest quality anilines make any dyeing job that's why they give such true, bright, new colors to dresses, draperies, lingerie.

The anilines in Diamond Dyes make them so easy to use. No spotting or streaking. Just clear, even colors, that hold through wear and washing.

Diamond Dyes never give things that re-dyed look. They are just 10c at all drug stores. When perfect dyeing costs no more—it's so easy—why experiment with makeshifts?

Diamond Dyes

Highest Quality for 50 Years

Cut Down Food Wastage

Responsibility For World Peace That Rests Upon Those Who Speak the English Tongue

Dr. Nicholas Murray Butler, president of Columbia University, addressing the Pilgrims Society in London, England, recently had a telling word to say of the responsibility for world peace of the English-speaking world. Dr. Butler said:

Everyone within the sound of my voice has read those opening chapters of the first volume of Mr. Winston Churchill's book, "The World Crisis." Those chapters trace back a hand of fate from Fashoda to Sarajevo what Mr. Churchill calls the milestones of Armageddon. You can actually see men in the hands of Fate marching to their death accompanied by an irresistible music of lure and ambition. Perhaps many of you have read what seems to me to be an exceptionally interesting bit of journalistic work done by Herr Paul Ludwig in his recently published volume called "July, 1914." He has assembled there what recent research enables him to do, and has placed in logical and chronological order every document which tells the story of that fateful month and of the first few days of the month that followed.

If you will read those documents you will see that perhaps twenty or twenty-five men, alone and unaided, carried ten million human beings to their death and destroyed the wealth of generations. What I mean, Mr. Chairman, is, imputing blame to none, least of all finding fault with an individual, what I would point out is that all that represents the bankruptcy of a mode of thinking upon which we must turn our backs. We must rise from the old-fashioned, selfish, competitive, quarrelsome nationalism to a new and loftier patriotism which finds a nation's highest purpose in its highest service. And when, Mr. Chairman, we state that fact, we indicate in a word the responsibility that rests upon those who speak the English tongue.

It makes no difference whether they live in this old homeland island or whether they have gone out overseas to build a dominion of the British Commonwealth of Nations, or found a government of their own. Their responsibility is one and single and undivided because of the trust they bear, and that trust is the trust of those institutions of civil, religious, political and economic liberty which we have been building for more than a thousand years. These institutions it is that we offer to our fellow-men, and the time has come to do this by effective example on our part, by persuasion and by leadership, through those who speak our views and frame our policy. We dare not, Mr. Chairman, sit still and let matters drift and take their course.

Good News For the Cook

It is planned at Paris to make a talking picture revealing the art of French cooking. The preparation of French delicacies, sought after the world over, will be depicted and explained in the film by an expert chef, who will be seen at work. The film is intended for world distribution.

The truth hurts, and so would you, if you were stretched as much.

"Is there still as much fighting here in the village as there used to be?"
"Oh, no! The people don't agree at all, now." — Nagels Lungue Welt, Berlin.

W. N. U., 1935

Mechanical Hen Was Instructive Exhibit

Created Great Amount Of Interest At World's Poultry Show

The exhibits in connection with the recent world's poultry congress in London, England, were instructive and entertaining. A model hen, seven feet tall, held the attention of thousands of visitors of both sexes largely on account of its novelty. Made of wood and cardboard and a few feathers, this bird had a set of mechanical "internal organs" which were visible and showed how life is ground in the gizzard and distributed. Naturally it would not be completed without an arrangement for laying eggs. A small motor operated the lathe on which the eggs were "turned." These small mannikins were attached to the various parts and arranged to furnish the power which really came from electric motors installed behind. With the aid of a special photograph in record the "hen" gave full explanation of the interval processes and incidentally gave information on proper feeds and methods of feeding. Poultrymen have shown a great deal of enterprise in bringing before the public the outstanding features of their industry and this "mechanical hen" is one of the outstanding accomplishments.

Marketing Geese

Good Time Now To Prepare Them For Shipment

The time to prepare geese for market is when the weather turns cold in the fall, state poultry experts of the Dominion Department of Agriculture. They should then be taken off pasture and those selected for market should be placed in small penned enclosures, provided with plenty of water and grit and kept clean. They should be fed heavily on white corn, the best medium for the fattening of geese, and about two weeks' heavy feeding should then be for market. Twenty-four hours before killing geese should be starved, but given plenty of water. Care should be used in plucking, the dry or steam methods being recommended, for the reason that the feathers are particularly valuable, bringing as much as 60 cents per pound. The dressed bird should be rubbed over with a damp cloth and set aside to cool. The twelve-bird box makes a desirable market package.

Safeguards the Consumer

Inspection Service For Fruits and Vegetables Assures Quality

The shipping point inspection service administered by the fruit branch of the Dominion Department of Agriculture is doing more than anything else to improve the quality and extend the market range of fruits and vegetables in both the domestic and export markets. Providing as it does a neutral determination, the certificate of the federal inspection service is accepted everywhere as the criterion of quality. The service applies to the canned as well as the fresh product, and the housewife buying canned products in Canada knows that she gets what she buys when she buys by the quality mark—"Choice," "Fancy" or "Standard"—which appears on the label. The quality determined by inspection at the canning factory goes into the can before the label goes on. The Federal grade, marked on the container is the consumer's safeguard and the assurance of quality.

The Proper Approach

A man who had been waiting patiently in the post office could not attract the attention of either of the girls behind the counter.

"The evening cloak," explained one of the girls to her companion, "was a redingote design in gorgeous lamb brocade, with fox fur and wide pagoda sleeves."

At this point the long-suffering customer broke in with: "I wonder if you could provide me with a neat stamp with a dinky perforated hem, the tout ensemble delicately treated on the reverse with gum arabic. Something about two cents."

Northwest Rebellion Veteran

Private Of Royal Grenadiers Visits Scenes Of Battles Of 1885

Andrew Mursion, who as a 21-year-old private of the Tenth Royal Grenadiers took part in the battles of Fish Creek, 50 miles north of Saskatoon, April 24, 1885, recently revisited the site of the combat.

He found the battlefield exactly as he remembered, it to have been 45 years ago. He saw the ravine where among the trees the half-breeds had their rifle pits and from which they fired on the troops who lay on the ground in the open.

Mr. Mursion tells how the advance scouts were shot from this ambush and the riderless horses came galloping back. The troops then advanced as if on parade and threw themselves on the ground in extended order. They fired back at the Indians, but only got an occasional glimpse of one as the enemy had prepared pits just over the lip of the ravine and only a head would sometimes be seen as a man rose to fire.

General Middleton had a horse shot under him and his cap blown off by a bullet, an incident which Mr. Mursion saw. He also recalls how a shell from the artillery blew up the Touronde House in which a number of rebels were concealed. A hollow in the ground now shows the former site of this house.

After a time the Indians disappeared from the ravine and the soldiers entering it found about 60 of the Indians' horses which had been killed by the shell fire. They found no Indian dead. The graves at Fish Creek are those of artillerymen killed in the battle.

Mr. Mursion also took part in the four-day battle at Batoche, on May 9, 10, 11 and 12, 1885, with the big charge on the final day. The church at Batoche near where the fighting began still stands.

Colonel Grassett, who commanded the Tenth Royal Grenadiers at Fish Creek is still living in Toronto, says Mr. Mursion.

Egg Laying Contest

University Of Saskatchewan Men Makes Good Showing

"Lady Victoria," former holder of the world's egg laying record, has completed her second year with an output of 203 eggs. In her pullet year at the University of Saskatchewan, this hen laid 338 eggs in 365 days, copying the record, but this has since been taken from her by a Black Orpington pullet in Australia, which produced 361 eggs in the year.

Though not a world's record, "Lady Victoria" did well to lay 203 eggs during her second year. Prof. R. K. Baker, of the university poultry department, says: "It is a high figure and will provide the university with much material for breeding purposes. Two daughters of the former champion started laying this week."

Rose Growing Business

Rose growing as a business is rapidly developing throughout Canada into a trade of considerable magnitude, according to the Ontario Department of Agriculture. Although the great majority of growers are found in Ontario, nurserymen and florists are cultivating roses in every province of the Dominion.

Canadian Cattle Re-enter England

Canadian beef will re-enter the British market for the first time since 1928 with the shipment from Montreal recently of 128 head of grade Herefords and northern steers, bred in Ontario and now consigned to a firm of importers in Manchester. The majority of the steers were raised on the farms of J. J. Henry, of Ridgeway, Ont., and A. J. Campbell, of Dutton, Ont., and were brought on the Canadian Pacific Railway to the Eastern Cattle Market, Montreal, to await shipment to the old country. Shippers of livestock believe that the British market, dead for the past few years so far as Canada was concerned, once more offers remarkable opportunities to Canadian breeders. One hundred and sixty thousand head of cattle and 62,000 calves, in addition to 29,000,000 pounds of dressed beef, were shipped from Canada to the United States last year, but for the future such trade is severely hampered by the unfavorable American tariff.

National Television On A Nation Wide Network Is A Dream Of The Future

Water and Salt

Live Stock And Especially Young Animals Are Often Neglected

How about the water and salt? As a rule, dairymen are careful that the cows always have plenty of good water. If the water is lacking or stale, the cows soon tell about it in the pail. Shorter milk cheques keep up interest to discover the cause. Observation reveals that the growing stock suffer more from lack of water through the hot months than do the milk cows. They are pastured away by themselves and not seen so often. If the water has to be pumped to them, it is often neglected. If they have a stream or spring and it goes dry, it may be days or weeks before the trouble is discovered. In too many cases the young stock drink swamp water and take it only as a matter of necessity. Under such conditions they cannot do well, no matter how good the grass may be. Another frequent cause of loss of thrift is shortage of salt. The salt box should be a regular part of pasture equipment. To build up a good store of minerals in the system a mixture of three parts bone meal and one part salt is advised. The same mixture should be used in the pasture for the milking herd.

Weed Seeds Are Hard To Destroy

Germination After Fifty Years Shown In Recent Tests

No wonder the farmer has trouble trying to eradicate weeds, for Dr. W. J. Beal, of the Michigan experimental station has just shown how long lived some of the seeds are. Fifty years ago he buried a lot of several different kinds of weed seeds. Every ten years some of these seeds are dug up and the attempt made to germinate them.

Strange as it may seem, some of the weed seeds which did not grow at the end of five or ten years germinated to some extent at the end of 40 years. Foxtail lived for 30 years, but has not been growing since. Two-thirds of the tumbleweed seeds were still germinable after forty years. Curled dock seed has a much longer life than might be expected, and was eighteen per cent germinable in the fortieth year. Several weed seeds will not live for even five years, but a great many of them will retain at least some vitality for thirty or forty years. Does this not show how very careful the farmer must be to keep the weeds before they have a chance to seed and spread many potential plants around.

Mail Was Delayed

Letters mailed 26 years ago in Paris have been sent to their destinations. The delayed mail was discovered when a truck demolished a post box in front of the Luxembourg station. Examination of the wreckage revealed that letters and postcards dated 1904 and 1905 had apparently slipped into a neglected corner of the box and were never collected.

National television on a par with sound broadcasting is a considerable distance in the future. When such a development will materialize, engineers hesitate to say. Dr. Alfred Goldsmith, vice-president and general engineer of RCA, and long identified with broadcast engineering, thinks it will not be possible until three years have elapsed, and it may be longer.

"It seems likely that national television service of proven value within a year would be a miracle," he said. "Within two years it would be an amazing feat; within three years it would represent a fine achievement of hard work, and within five years it would be a development proceeding at a good and normal pace."

"Television is developed as a service of real entertainment and instructional value to the public. It will take its place beside radio broadcasting as one of the greatest agencies of human progress and enjoyment, but it is not to be expected that the day of television is as yet at hand."

"Laboratories are doing excellent work in the development of television and will probably ultimately bring the equipment to a satisfactory stage for public use. It is dangerous to make any definite prediction as to how long this will take."

Dr. Goldsmith pointed out that the term television means so many different things to various people that a clarification is important.

"Some think it means small, dim, blurry and shifting images. Others think it means perfect, large brilliant pictures like the finest movies."

"Television is a radio service of pictures in motion of sufficient detail and quality to have continuing entertainment value to the public, month after month and year after year. It is believed that it is necessary to be able to show clearly the head and shoulders of several people in a closeup and also action of a group at a greater distance with a reasonable amount of background detail."

"It is necessary that receivers supplied the public be simple, compact, quiet, and fairly automatic and reliable in operation and reasonable in cost. Pictures must be brilliant enough to be seen in an ordinary dimly lighted room, of good color, of adequate detail, of real pictorial value, without annoying flicker, and visible to persons seated in various parts of the room."

"In order that the people of the United States and Canada shall enjoy such a service it must be carried out on a national scale. This means erection of numerous television transmitters. They must be located at proper points all over the country, and on occasion be interconnected by wire, radio or through shipment of film subjects so the programmes of interest may be brought to the public promptly."

Establishment of transmitting station and creation of programs for the entire continent is a lengthy and expensive job. To be of value to the public, programmes must be arranged so that they will co-ordinate easily and sound properly. Correct wavelengths for television for city, suburban and rural service must be determined. Incorrect choice of wavelengths means ruined or unreliable transmissions."

"What is the difference between capital and labor?"

"Well, I suppose I lent you \$5."

"Yes!"

"That is capital."

"Then what is labor?"

"Getting it back from you."

The professor who hasn't forgotten his umbrella.—Hummel, Hamburg.

FEDERAL PLAN TO PROVIDE WORK FOR UNEMPLOYED

Ottawa. — "Work, not charity" — this is the basis upon which the government is proceeding in its effort to deal with the unemployment problem. Thus declared Hon. R. B. Bennett, Prime Minister, in the House of Commons.

Before the House in committee, the Premier explained the government's proposals for spending the \$20,000,000 which he is asking parliament to vote. These include building of public works, such as wharves, bridges, etc., which are national undertakings but which would not of necessity have been started immediately except to relieve the present situation.

It is proposed to assist the provinces in connecting up the unfinished portions of the trans-Canada highway, and in this connection the prime minister suggested that assistance might also be given out of the Federal treasury for the maintenance of highways connecting provinces.

The railway companies have been asked to inform the government what works they can undertake. Mr. Bennett stated, and assistance would be decided upon in relation to the cost of such undertakings. The question of the Peace River outlet will be left over, he said, until the next session of parliament, which would be called soon after the new year.

The Dominion government will deal directly with the provinces in its assistance to public works of a provincial or municipal nature, and also in granting one-third of the amount expended in cases where municipalities have to provide relief other than that of giving employment.

The amendments to the customs act respecting dumping are expected to relieve considerably the unemployment situation, by giving employment in a few weeks. Mr. Bennett hoped, to some 25,000 men now out of work.

Information received from the various provinces of Canada indicates that there are now 117,000 people out of work in the Dominion. There is a prospect that this number may be increased to 177,000 during the coming winter.

Mr. Bennett gave the above figures indicative of the scope of the unemployment problem in the Dominion.

Wheat Crop Estimate

Federal Government Forecast Of Wheat Crop Is 384,769,000 Bushels

Ottawa, Ont.—Canada's wheat crop is estimated at 384,769,000 bushels, of which 362,000,000 bushels will be garnered in the three prairie provinces. This is the forecast, made public recently by the Dominion Bureau of Statistics based on reports filled in on or about August 31.

Of the above total for all Canada 364,481,000 bushels is spring wheat. Last year's spring wheat crop totaled 284,016,000 bushels and the entire wheat crop was 304,520,000 bushels. "The western wheat crop," the report states, "is very spotty and thin difficult to estimate because of a series of depreciating weather effects from seeding until harvest."

"The crop has been favored by relative freedom from frost damage and by almost ideal weather for harvesting," the report declared. "The short straw and the extended use of combines have also aided the dry season to establish a new high record for earliness and volume of grain marketed in the month of August. Inspectors to date show the quality to be even above that of last year."

Starving Boys Steal Biscuits

Montreal, Que.—Unable to buy food, three boys took three boxes of soda biscuits from a local grocery store. They were arrested and turned over to the juvenile court. The youths told police they had not had a proper meal for a month and were starving. A visit to their homes showed squalor and starvation.

Italy is giving government aid to aeronautics.

W. N. U. 1855

Fast Automobile Journey

From Toronto To Vancouver In 95 Hours and 15 Minutes

Vancouver, B.C.—From Toronto to Vancouver by automobile in 95 hours and 15 minutes is the record achieved by two youths of Oakville, Ont. The fastest train scheduled takes 85 hours to do the same journey.

Dick Henry and Vernon Dymos left Toronto Thursday, at 11 p.m., and arrived here Monday night, at 6:30 o'clock. They proceeded from Toronto to Sault Ste. Marie, thence across United States territory to Emerson, Man., from there they followed the main prairie roads to Crows' Nest Pass, through the Rockies to Vancouver.

May Return To Public Life

Rumor That Hon. C. A. Dunning Will Continue In Politics

Ottawa, Ont.—The return to public life of Hon. C. A. Dunning, former Minister of Finance, who was defeated in Regina, is still regarded as very much of a possibility.

It is suggested that Rt. Hon. W. L. Mackenzie King, opposition leader, had Mr. Dunning in mind when he made his reference to familiar figures who were absent from the Commons, during his speech on the address from the throne.

Mr. Dunning was one of the most prominent debaters in the Liberal ranks during the last parliament.

Girl Swims English Channel

Nineteen-Year-Old Maid From Africa Performs Difficult Feat

Dover, England.—Nineteen-year-old Peggy Duncan, South African girl swimmer, ranked among the few mermahs who have made the recent swim across the English Channel, although she was balked in her purpose of beating Gertrude Ederle's time in accomplishing the feat.

Miss Duncan, who weighs 200 pounds, landed at South Foreland, England, after swimming from Cape Gris Nez, France, in 16 hours and 15 minutes. Miss Ederle's record is 14 hours and 25 minutes.

Steamship Breaks Record

"Empress Of Japan" Makes Fast Crossing Victoria To Honolulu

Honolulu.—Breaking all records from Victoria, B.C., to Honolulu, the Canadian Pacific steamship "Empress of Japan," arrived here in four days fifteen hours and fifty minutes for the 3,239 miles.

On her maiden voyage, the liner lowered the record between Yokohama, Japan, and Victoria, to eight days, six hours and twenty-seven minutes, August 22. This trans-Pacific record had stood for seven years.

Totem Pole For President Hoover

Baltimore.—Another gift is on its way for President Hoover's collection. It is a totem pole about a foot high, carved from a white oak, to be presented to him when he arrives to review the parade of the Veterans of Foreign Wars. The totem pole is the gift of Denial Post, Anchorage, Alaska.

Nurses Have Eight Hour Day

Ottawa, Ont.—As a measure towards relief of unemployment the board of trustees of Ottawa Civic hospital have decided to provide an eight-hour working day for nurses on the staff. Three shifts of nurses will now be employed daily in place of the present double shift of 12 hours each.

Ogopogo Still Lives

Hamilton, Ont.—Prompt action by Vernon, B.C., in broadcasting denials that Ogopogo had died a violent death, met with reward recently when the Union of Canadian municipalities voted to meet next year at the sea serpent city. Vernon delegates promised a sight of Ogopogo, and the vote was unanimous.

Graf Zeppelin Visits Russia

Moscow, Russia.—The Graf Zeppelin paid her first official visit to the Soviet capital, and was greeted when she landed at October field with red flags flying and bands playing proletarian airs. After a brief visit she returned to Germany again. Dr. Hugo Eckener was greeted by high Russian air officials.

MISSIONARY FROM NORTH

Rev. L. E. Atkinson, eight years a missionary among the northern Cree at Oxford House, Man., a post one week's travel beyond the north end of Lake Winnipeg, is one of the commissioners elected to the general council of the United Church of Canada, meeting in London, Ont., in mid-September. He was born near Stouffville, Ont., and attended Victoria College, Toronto.

A Golf Marvel

Consecutive Hole-In-One Title Is Received By Married Couple

Saskatoon, Sask.—Up at the little town of Waldron in northeast Saskatchewan, R. L. Penny and his wife lay claim to the consecutive hole-in-one title for married couples.

Mr. Penny slipped a drive from the fifth tee on the Stella course and gasped as he saw the golf ball roll into the cup. His chest was still expanding as his wife brushed him aside and teed up her ball. A swing, a smack, and the white sphere bounded toward the pin, rolled about the rim of the cup—and dropped in beside its mate.

Mr. Penny says imitation is flattery's sincerest form. Mrs. Penny claims the female of the species is as deadly—on the drive—as the male.

Wheat From Russia

Cargo Of Russian Wheat Is Received In Scotland

London, England.—The first example of Russia's wheat export campaign is the arrival of 7,000 quarters (a quarter equals eight bushels) of Russian wheat at Leith, in Scotland, for the Scottish Co-Operative Wholesale Society.

This is said to be the first Russian consignment to Scotland since the war, and it was made in spite of the reported stringent food shortage in Russia.

Sixty Bushels To Acre

Lancer, Sask.—The biggest crop in this district was threshed on Mrs. F. E. Spence's farm three miles north-west of town, the average for the field being 60 bushels of wheat to the acre.

"Miracle" Heroine Here.

Lady Diana Manners, famous English society beauty and equally famous heroine of "The Miracle," during its New York and Boston productions, photographed with her husband, Captain Alfred Duff Cooper, D.S.O. (left), Viscount Edmon and his son William Edmon, at Windsor, North Station, Montreal, on her first visit to Canada. The party are on an extended trip through Canada, as far as Vancouver, with a long stay at the Nipigon Bungalow Camp. Lady Diana thought the talkies would not out the legitimate stage and observed "people still appear to be building ordinary theatres."

Canadian Ace Killed

Captain Dickie Meets Death In Accident Near Fort William

Fort William, Ont.—Captain James A. Dickie, Canadian war flier, died when his plane swooped eastward and crumpled its nose in the rough forest land ten miles from the outskirts of Fort William. Eighteen-year-old Marion Swain, who was flying with Capt. Dickie at the time of the crash, lies in hospital here in a critical condition.

Cause of the accident, witnessed by only a few persons, could not immediately be determined. It is believed that the Coyne Moth, a machine familiar to the war ace, swung into spin from which it could not be extricated. Position of the passengers in the debris did not indicate to rescuers which one was piloting the plane when the accident occurred. Miss Swain recently obtained her student pilot's license.

Capt. Dickie, only recently named secretary of the Flying Clubs Association of Canada, was well-known among Canadian airmen. He had previously been instructor of the Fort William Flying Club. Formerly a resident of Winnipeg, he came to the lake head six years ago and opened a drug store in Fort William. Only a few months ago he was married to Miss J. Burnett, of Fort William.

Colleges For Firemen

Future Fire Fighters Will Be Specially Trained In Profession

Winnipeg, Man.—Firemen of the future will be graduates of fire colleges where they will receive highly specialized training in all phases of their profession, Chief Ralph J. Scott, president of the International Association of Fire Chiefs, declared before the first business session of the Fire Chiefs' convention here.

He said that during the past year he had devoted every effort to furthering the idea of the fire college endorsed by the international convention which met last year in Birmingham, Ala. Officers of the Los Angeles, Cal., Fire College—first of its kind to be organized—explained methods of instruction at the school.

Cut-Off May Be Included

Appropriation For Winnipeg's Short Route To Bay Railway Expected

Ottawa, Ont.—Provision allowing the construction of the proposed Mafeking cut-off in Manitoba to the Hudson Bay Railway will probably be included in the \$20,000,000 expenditure proposed by the government on national undertakings.

It is understood that work on the short route from Winnipeg to the Hudson Bay Railway will start this fall.

Increased Population

Toronto, Ont.—The population of Toronto has increased 15,226 within the last year according to the assessment commissioners report. The total population of Toronto is 621,598.

UNITED STATES MOVES TO HALT IMMIGRATION

Washington, D.C.—The state department has announced that in carrying out President Hoover's wishes for more strict application of the immigration laws to aid unemployment; conferences will be held at Winnipeg and Vancouver, in addition to three consular conferences overseas.

The Canadian conferences are set for this week and another date early in October. Foreign Service Inspector Monnet B. Davis has been designated to attend the conferences in the Dominion.

A conference at London, England, September 22 and 23 will draw the consular officers in England, Ireland and nearby points to the continent. Officers from France, Germany, Switzerland, Austria, Sweden, Italy, Czechoslovakia and Jugoslavia will meet at Stuttgart, Germany, September 26 and 27.

A third conference for the consular officers in Poland, Finland and Latvia, completing the plans for all large immigration centres in Europe, will be held October 1 and 2, at Warsaw.

Under the president's plan, immigrants to the United States must show they will not become public charges. At present, aliens entering the country with position previously considered for, are denied entry under the alien contract labor law.

Ottawa, Ont.—Announcement from Washington that more stringent measures are in contemplation in regard to migration to the United States was very greatly received here recently without any great degree of surprise. Unemployment in the country to the south has frequently been stated to be considerably worse than in Canada, and it was expected that steps might be taken to curtail the movement in that country.

It is generally accepted, however, that the present emigration from Canada across the border is not great enough to cause apprehension in Washington.

Bootlegging Of Grain

Manitoba Pool Takes Steps To Stop Practice

Winnipeg, Man.—A determined attempt to prevent the "bootlegging" of grain by wheat pool members was started recently when eleven inter-injunctions against farmers were sought by the Manitoba Wheat Pool before Mr. Justice Donoyan in chambers.

Sale of grain by pool members to non-pool purchasers is a breach of the organization's five-year contract, and constitutes what the trade calls "bootlegging."

Grain Exports From Vancouver Higher

August Shipments Reported To Be Higher Than Any Recorded

Vancouver, B.C.—Grain exported from Vancouver during the month of August totaled 2,933,519 bushels, almost 600,000 bushels more than was exported in August, 1928, when grain shipments reached a peak of 95,000,000 bushels on this port.

Last month export to the Orient totaled 559,789 bushels, compared with 690,221 bushels in August two years ago.

Timber Cutting Stopped

Ottawa, Ont.—On the request of the Premier of Saskatchewan, Hon. Thomas G. Murphy, Dominion Minister of Interior, has ordered no more licenses or permits to cut railway ties, pulpwood and other timber be granted in the province of Saskatchewan, prior to October 1, next. It is felt that date that the province takes over administration of its natural resources.

May Give Up Flying

London, England.—The Daily Herald says that Wing Commander Charles Kingsford-Smith, Australian aviator who recently flew from Europe to the United States, has abandoned his plan for a homeward flight to Australia, and has quit flying entirely, on physician's order.

Stony Plain and District

Bill Comisarow went to Bashaw over the "week-end," visiting Mr and Mrs S M Weinberg.

The Moose Lodge held a meeting on Monday night, in Moose hall.

The Glee Club has arranged to hold another of their popular dances the evening of Friday Oct. 10. A City orchestra has been engaged.

The Cash Store will be closed on Tuesday and Wednesday, Sept. 23d and 24th.

On Saturday evening, while young Percy Bearham junior was making a purchase in a local restaurant he was assaulted by a Russian harvest hand named Hittenduksky. The young lad was given several slaps, which he resented as the assault had been entirely unprovoked. After committing the offense. Hit left town hurriedly.

The only case of interest to Stony Plainers at the opening of the district court in Edmonton was that of Hasse v. Washburn. The case arose as the result of a dispute over a trade of a car and a rifle. His Honor Judge Dubuc, who was presiding, gave judgment to the plaintiff for the amount of his claim. Geo. J. Bryan acted for the plaintiff, and W R Howson for defendant.

The Sunday School Rally Day service will be held in the United church Sunday, Sept. 28, 7.30 p.m. All are welcome.

Do not neglect your eyes. Get them now! Charges are reasonable, \$10.00 and upwards. The very latest, best frames and lenses only supplied. At Royal Hotel on Friday Sept. 19th., M. M. Mecklenburg.

Going Up!

This is Edmonton's Air Show week, and no doubt everyone from this district who could attend, was present yesterday at the big show.

Stony Plain had its air show last week, Mr J Hansen being here for four days with his bi-plane, using the Fair grounds for a landing field. He was busy practically every afternoon, taking up passengers for the circuit. To those patrons who could stand the strain, a few thrills in the shape of nose dives, flip flops, somersaults, etc., were thrown in for good measure. The patrons were confined, mostly, to the younger people, the older birds naturally preferring to stay on terra firma. The birdman took his plane to the City Saturday night.

Two local young apartment-claim the record here for trips up—one having blown in \$63, and the other \$47 for traveling the air route.

Pie-eating Contest.

That we have some husky feeders among the lads who are helping harvest this year's crop was demonstrated the other evening at a farmhouse not so far from Stony. Along with the rest of the crew, the young man in question had helped, at this sitting to demolish a tableful of grub consisting of all the ingredients of what a harvest jack considers a square meal, including a pot of hullepeau.

The feeders had about finished when the host very mistakenly offered to bet that not one of them present could eat another bite. The bet was taken by the young man, who said he could eat two pies for a bet of six-bits. The pastry was produced—a lemon meringue and a ten inch apple dainty. These were stewed away in record time by the young man, before the admiring eyes of the rest of the crew and the sorrowful gaze of the pie-maker.

A Pioneer Passes Away

The funeral took place on Sunday last of one of Stony's oldest pioneers in the person of Mr Edward Hoffman. A service was held at his late residence; another service was held at Emmanuel Lutheran church by the pastor, Rev G. Poetzsch. Interment took place in Rosenthal cemetery, and was attended by a very large number of friends and acquaintances of deceased.

Mr Hoffman was 65 years of age, and came to Canada about 40 years ago, settling first in Wetaskiwin district, where he remained for several years, afterwards trekking to the then new district of Stony Plain, where he had resided up to the time of his death.

Mr Hoffman was of the type of our best settlers; altho not being endowed to a very great extent with this world's goods on arrival, still, with his energy, enterprise and thrift, he had acquired a fair competence. Altho a man of retiring manners, he was noted for his integrity and reliability, and was highly respected by all who knew him.

He leaves to mourn his loss his wife; three daughters, Mrs J Miller, Spruce Grove district, Mrs Barth, Mrs J Ulmer; and five sons, Rudolf of Wetaskiwin, Edwin, Carl, Otto, Jac.

Spruce Grove News

Mr Atkinson, a former merchant here but now of Vancouver, was in the Grove this week, on a visit.

Mr Connolly made a motor trip to Edmonton on Monday.

Mr Joe Miller headed a party of shooters which went up to Low Water Lake on Monday, to shoot geese.

Mr Jac Schnetz has an application placed with the Calgary Power Co. for an extension of their service line farther south to his residence and grounds, for heating and lighting purposes.

Four unclaimed impounded heifers were sold Tuesday, at the local pound.

The large party of small game hunters which left the village early Monday morning, to go after the feathered beauties, made a survey of numerous sloughs, where the ducks had recently been; got lost a couple times; found themselves up near Onoway, and returned in time for an early dinner. The Captain of the party said they got more three ducks. Well, there were six in the party! One of the guns insisted on firing two shots every time you pulled the trigger.

Big Fat Boy claims he did not catch a cold, from the effects of retrieving a duck on Monday morning, having gone into a slough clad only in his birthday suit.

Here and There

(606)

"We are quite satisfied with the showing of the British teams at the Empire Games last concluded at Hamilton, Ont., for we picked up quite a lot of honors, and if I may say so, made a very creditable showing," was the statement of R. T. Britten, in charge of the swimmers, made up several new marks at the meeting. He thought the Games would be of incalculable value to the Empire as a whole, since they brought all parts of it together at one time and one place.

The maiden voyage of the new Canadian Pacific flagship of the Pacific, the Empress of Japan, from Yokohama to Victoria, was completed in eight days, six hours and 25 minutes, beating the Empress of Canada record for the run, established in 1918, by four hours and thirty minutes. E. W. Beatty, chairman and president of the railway company wired congratulations to Captain E. Allman, general superintendent of the Company's Pacific steamship fleet. Records also fell on Oak-At last when the company's liner Duchess of York travelled between Greenock, Scotland, and Victoria in 17 hours and 25 minutes, even bettering the time hung up by the Duchess of Richmond on her previous trip from Belfast to Quebec, which is a hundred miles shorter.

Speaking at a banquet given by the Saint John Board of Trade to inaugurate the service of the new Canadian Pacific steamer Princess Helene, on the Saint John-Digby route, E. W. Beatty, chairman and president of the railway, said he thought Canada would respond more quickly than other countries, even wealthier than herself, to measures taken by responsible governments and large industrial organizations to alleviate unemployment. He added that in his opinion the Maritime Provinces were particularly favorably placed in this respect.

Dressed in white and blue kirtles and the traditional Normandy caps, fifty Louisiana girls, descendants of the Acadians expelled from Nova Scotia 175 years ago, assisted in the celebrations at Grand Pre recently, at which many Acadians living in the United States and Canada attended. The United States, France, Great Britain and Canada were represented at the celebrations which were held on the site of the old village and around the Memorial Church made ever famous by Longfellow's poem of Evangeline.

In the provision of telephone communications in cities of 60,000 and over and in conversations per capita, Canada leads the world, according to statistics recently published. In these cities Canada has 21.2 telephones per 100 inhabitants against the United States' 21.8. In 1929 Canadians made 241.1 conversations per head of population as compared with 230.7 in the United States, her nearest rival.

A total of 18,028,972 telegrams was transmitted and received in Canada in 1929, an increase of 1,172,763 over 1928. There are 360,895 miles of telegraph lines in Canada.

ENO'S FRUIT SALT

Mothers! Don't Risk Their Health With Violent Purgatives

Constipation is one of childhood's greatest enemies. Unless the intestinal system is kept clear and clean, ill health is almost sure to follow.

But severe acting laxatives are dangerous. The bodily system of child or adult is not meant to withstand the unnatural, forcing action caused by ordinary, cheap cathartics.

ENO'S "Fruit Salt" in a glass of water, every morning—is the safest, surest and most pleasant way to insure cleanliness and perfect health.

But Jim Bennett suddenly pushed between them. "Get out," he commanded brusquely, with a nod at the door marked "Private." Thus was the president of the Wickfield National Bank ejected from his own quarters. He went peacefully, but not before he had seen something that caused him to blow his nose with exceeding violence as he closed the door: Charman was weeping, her tears soaking the shoulder of Jim's new suit.

"You promised not to cry, dear!" Jim reminded her after an interval. She stirred, as if to move away, but his arms held her so relentlessly that she relaxed and said, not raising her eyes: "I'm terribly ashamed to— to give way like this, Jim. But—but I felt so homeless all of a sudden."

Her voice trembled with heart-break. Jim couldn't stand it. "Don't say that, Charman," he cried, his own voice shaking. "Homeless! Why, you've got that precious little grand mother, and—and me—any time you'll say the word."

Under the new coat she felt his heart race, as hers was racing. It gave her courage to ask shamelessly: "Then—then you aren't going to be married, after all?"

"Not unless I marry you, sweet heart," he answered.

When BABIES are Upset

BABY ills and ailments seem twice as serious at night. A sudden cry may mean colic. Or a sudden attack of diarrhea. How would you meet this emergency—tonight? Have you a bottle of Castoria ready?

For the protection of your own—for your own peace of mind—keep this old, reliable preparation always on hand. But don't keep it just for emergencies; let it be an everyday aid. Its gentle influence will ease and soothe the infant who cannot sleep. Its mild regulation will help an older child whose tongue is coated because of sluggish bowels. All druggists have Castoria.

**Fletcher's
CASTORIA**

W. N. U. 1855

understand, how well the M.D. was fixed financially, and I wanted to make sure you'd have the house. I hadn't doped out just how I'd give it back to you, but I'd found a way. It looked then as if it were the only thing I'd ever be able to do for you, dear—and I wanted to do so much! And then Uncle George wrote that he suspected you'd turned down the doctor, so—well, I thought if I owned the place, you and Grandma could stay right on as caretakers and fix it up, the way you've always wanted to. I even hoped that as time went on, I'd get to see that the love I had for you might be worth considering.

"And then all of a sudden I couldn't bear it! I knew I'd got to come home and find out where I stood. I got up at midnight and began to cram things into a suit case. Mother looked in the door and called Aunt Sophie. She was under the impression that I'd lost my mind or—"

As Jim talked he had reached for the newly signed deed and was slowly tearing it into strips under Charman's fascinated gaze. It was this that caught George K.'s eyes when, after a considerable rattling of the doorknob, which passed unnoticed, he returned to his own domain.

"What in the name of Sam Hill are you doing?" he demanded with a glance at the waste basket into which Jim had dropped the fragments. "Have you backed out of your bargain at this late date?"

"Yep," replied Jim happily, "but I made another promise—love, honor, and obey, you understand. Sorry to have caused you all this trouble, Uncle George, but it would be rather foolish to have this paper recorded and then, a week or so later, decide the place back to my own wife. I think you'll agree to that."

The president of the Wickfield National Bank sank slowly into his worn leather chair. "Jim," he announced shaking his gray head, "when it comes to picking out a wife you've got more horse sense than my three boys put together. As for Charman, it's my opinion that she might do worse, considerably worse. But—"

"Uncle George!" broke in Charman reproachfully, "you said that the man who wanted to buy our house was someone who had driven by and—"

"Well," interrupted the banker with a twinkle, "I don't know any one who's haunted your vicinity more than Jim has!"

"You said," went on Charman, still reproachful, "that he was going to be married, and—"

"What's wrong with that statement?" demanded George K., smiling. "You haven't the heart to let him vegetate into an old back like Grandpa?"

Jim made an unsuccessful effort to suppress a grin, and said: "I'd no idea you were such an accomplished liar, Uncle George; but as I drove you into it, if you'll promise not to let it happen another time."

"Clear out, both of you," commanded George K. briskly. "I'm going home this minute and tell Salina. I'm expecting a man from Portland on the eleven-ten, but he'll have to wait—damned if he won't! I haven't been so happy since I got word that I was a granddad. Run along, I'm in a hurry." Then, as the young folks reached the door he added: "Charman, haven't you forgotten something, my dear?"

Charman laughed, came back, and said as the president of the Wickfield National took her in his arms: "I was wondering if you'd let me go this time without a kiss!"

CHAPTER XXX.

It was twilight, and Grandma Davis sat by the window, living over every hour of the day that was drawing to a close. She had been in a sort of blissful daze from that moment when Charman and Jim Bennett had burst in upon her, the girl sinking down at her knees as she had always done in childhood when there was anything wonderful to tell. Sometimes it was merely the arrival of the first crocus, or news that the

baby bluebirds in the apple tree were trying their wings. Sometimes it was the prospect of an unexpected treat; a coming circus, perhaps, or a Sunday School picnic—but it was here at Grandma's knee that all glad tidings were poured out. Yet, though the old lady, catching her breath sharply at its beauty, never before had such radiance show from the girl's face.

"You'll never have to leave the old house, Grandma darsling," she was saying tenderly. "Thanks to this blessed Jim it's ours forever and ever, amen."

Grandma looked up at Jim, then back at Charman. She did not say that with some strange dash sense she had known when they left her that Charman was on her way to sign the deed. It had been a bitter hour for Grandma, waiting there in silence with her memories; and now she asked, not seeing the way quite clearly: "You mean, dearie, that you've sold the house to Jim?"

The young man came closer, smiling down upon her.

"That wasn't necessary, Grandma. Can't you guess why?"

His eyes met Charman's in a glance that needed no interpretation, and Grandma cried: "You mean she—she's taken you, Jimmy? She's really taken you?"

Jim laughed softly.

"Incredible as it seems—she has!"

"And you're not doing it just for me, dearie?" Grandma's wrinkled face bore a strange mingling of joy and fear. "You wouldn't be fair to Jimmy, Charman. He deserves the best. You mustn't cheat him even to keep my heart from aching. You're not doing it just to get the house?"

Little Helps For This Week

"Let us not be weary in well-doing, for in due season we shall reap, if we faint not."—Galatians vi. 9.

He liveth long who liveth well. All else is life but flung away. He liveth longest who can tell Of true things truly done each day.

Then all each day with what will last. Buy up the moments as they go: The life above when this is past. Is the ripe fruit of life below.

—Horatius Bonar.

It is the care of the wise and good man to look to his manners and actions, and rather to how well he lives than to how long; for whether he live long or later is not his business; but whether he shall die ill or well.—Seneca.

"Yes, granny, I'm to be married in June."

"But, my dear," said grandma, "you are very young. Do you feel you are fitted for married life?"

"I am being fitted now," exclaimed the prospective bride. "Seventeen new gowns."—Tit-Bits.

B.C. Coal For Peru

Trial Shipment Of Coal From British Columbia Goes To South America

An initial shipment of coal from British Columbia has been sent to Callao, Peru, where it is being favorably received. In the past, Great Britain supplied 75 per cent. of the 30,000 tons required by Peru annually, but owing to some extent to the New South Wales coal strike and to the depressed shipping conditions on the North Pacific, Canada has been able to invade this market.

Picture of Health Now

"In May and June I was badly run down and had faint spells until it was a drag to do my work. In July and August I didn't seem to pick up so I decided to try Lydia E. Pinkham's Vegetable Compound because I saw it advertised. I took two bottles and now I feel the picture of health. I am fine, do all my work and milk two cows. If any woman writes, I will certainly answer her letter."—Mrs. George R. Gillespie, Punchnich, Saskatchewan.

Town Planning in Alberta—By H.L. Seymour

ARTICLE 2—The Subdivision of Lands by Registration of Plans

A subdivision has been and may be again the genesis of a city. Every subdivision as proposed deserves careful attention. Regulations of the Dept. of Public Works in regard to subdivisions of land include the provision "all land to be subdivided shall be eminently suited for the purpose it is intended" and "should it appear that the whole or any part of the land proposed to be subdivided, is not in the public interest to be subdivided or offered for sale to the public" the registration of such subdivision can be refused.

With certain exceptions, ten per cent of the total area of a subdivision being registered is to be set aside for public or park purposes; residential lots are to be at least 50 feet wide.

For subdivisions outside of cities, towns or villages, there must be registered a caveat, which is in effect a simple form of zoning bylaw, classifying the use of lots for residential, commercial, industrial or agricultural purposes until there be formed a village or town which can make its own zoning regulations.

It should be stressed that by the intelligent co-operation of the owner, the surveyor and the government officials concerned, many mistakes of the past can be avoided.

Tentative plans of proposed subdivisions as prepared by an Alberta surveyor should be forwarded to the Director of Surveys, Parliament Buildings, Edmonton. All such plans are also subject to the approval of the Provincial Town Planning Board, and to consideration by a local town planning commission where appointed.

Mr. Donaldson's Trip to North

Ex Mayor Donaldson returned home on Friday from a fortnight's visit to the north country. He visited his son Manly, who is teaching at Faust, paid a visit to the Alt family at Grande Prairie and also made a call on Stuart C. Elliot, manager of the Bank of Commerce at Berwyn.

It Happened on the Baseline

On Saturday afternoon a story was brought to Officer Bone, A. P. Police, of a Stony Plain girl who left town about 9 that morning, to pay a day's visit with friends living on a road two miles west.

The young lady, who was traveling afoot on the Baseline, claims that when about half way on her journey she was accosted by a young man who had just stepped out of his car and who pointed a revolver at her head, demanding her money. She gave the highwayman her purse, containing a small sum.

At this juncture, it is claimed another car drove up to the scene, out of which latter vehicle hopped two more young men who demanded to know "what was doing?" The girl told them the story of her hold-up, whereupon the two newcomers insisted that Bandit No. 1 throw the revolver away and give back the purse with the pennies. This the bandit did.

The girl claims the men then tried to induce her to get into one of the cars and go with them. This she declined doing; whereupon they drove off, as another car was approaching. The girl then continued her journey to her friend's home.

On arriving there, the girl phoned to a friend of hers in town here, telling her of the occurrence. The lady reported the matter to the Police.

The Officer started to investigate; drove out for the girl, and took her to the scene of the hold-up. No marks of a struggle were found; in fact, no fresh imprints were discovered at the point she indicated; the nearby brush was searched to the limit a man may have thrown a gun, but no weapon was discovered. Occupants of nearby houses on being asked, replied that they had not noticed anything out of the ordinary occurring that morning, and expressed surprise when told the story.

The case was reported in; and the authorities now have the whole matter under advisement.

The several amendments the young lady has made to her original story has made the case somewhat of a puzzle.

Duffield Doings.

Mrs. D. Taylor, Mrs. Roberts and Mrs. G. O'Sullivan will be the hostesses at the meeting on Tuesday next, September 23d of the local Women's Institute. The program will consist of a paper by Mrs. Lent on "Vitamines, Vegetable and Food Values"; discussion on pickling and preserving; finishing up with the roll call—favorite recipes and why.

Services will be held in the local R. C. church on Sunday next at 11:30.

Clyde Smith held a sale on Saturday last for Mr. Charles Raynor, on the latter's farm near Wabamun.

The greatest value on the market

New Series PONTIAC now Reduced to as low as \$880.

NOW, with prices reduced as much as \$110, the New Series Pontiac Big Six is the greatest buy in Canada today.

A really Big Six, truly beautiful, with big car performance and Pontiac dependability—selling for as low as \$880 at factory, Oshawa!

"The greatest value on the automotive market", writes an enthusiastic new Series Pontiac Big Six owner. "With the first benefits of big car beauty and fine performance, there is an added bonus of close operating economy and enduring first class performance."

Many such letters have been received and are in our files—all from motorists whose friendship has been cemented by Pontiac's added value and finer performance.

Every one of the many mechanical details and comfort-giving features comes in for its share of admiring comment. The husky, powerful 60 horsepower motor; the new, improved steering gear; the strengthened Fisher Bodies with new features of beauty, insulated comfort and lower appearance; the new controls and instruments; the sloping, non-glare windshield; improved Lovejoy shock absorbers, the advanced lubrication system, four wheel brake design and four-point, rubber insulated engine mounting that quells vibration.

This great value can be purchased conveniently at the reduced price through the facilities of G.M.A.C., General Motors' own time payment plan. The General Motors Owner Service Policy assures your complete and continued satisfaction.
